Weblancer | Freelance Frontend Developer

01.10.2024 -

Specializing in creating websites based on Figma prototypes, developing WordPress-based websites, building small full-stack projects, and implementing frontend website updates.

PROFILE

Some of the projects I've worked on include:

- Developed a web application using Next.js, React, MUI, and Node.js, featuring user authentication, a sidebar menu, and integration with Google Cloud Storage.
- Created custom plugins for WordPress using PHP, React, and JavaScript.
- Extracted data from open-source platforms into an SQL database used Python, then displayed the data with filters for end users via PHP.
- Creating customized WordPress websites with features like contact forms and WooCommerce integration
- Small full stack to-do list project and deploying it on Heroku

WORKSKILLS
